60 Years of Scientific Conferences
of the Italian Economic Association

24-26 October 2019
Palermo

La Riunione Scientifica Annuale della Società Italiana degli Economisti torna a Palermo dopo oltre mezzo secolo ospitandone la 60esima edizione. E' un evento che coinvolge numerose associazioni scientifiche di analisi e studi economici del Paese a cui partecipano docenti e ricercatori delle diverse discipline economiche che operano presso le Università o presso le più importanti istituzioni italiane nel campo dell'economia e della finanza.

Al congresso partecipano più di 400 delegati che presenteranno relazioni in oltre 80 sessioni tematiche.

L'edizione di quest'anno ha come tema generale "Economie, Idee e Politiche: 60 anni di Riunioni Scientifiche della Società Italiana degli Economisti" e cercherà di mettere in evidenza come, e sino a che punto, gli approcci teorici in economia abbiano influenzato "negli ultimi decenni" i più importanti eventi e le più significative decisioni di *policy* nei mercati e nei sistemi economici.

Le sessioni plenarie si concentrano, in particolare, sui temi del confronto tra globalizzazione e nazionalismi (con una "*invited lecture*" di Maurice Obstfeld dell'Università di California, Berkeley) e sulle sfide della sostenibilità per lo sviluppo economico. Altre importanti sessioni affrontano questioni al centro del dibattito corrente, quali l'indipendenza delle Banche Centrali, i rapporti tra concorrenza ed efficienza nella gestione dei servizi pubblici, gli effetti locali e globali delle migrazioni, le criticità attuali legate al processo di integrazione europea.

L'Università degli Studi di Palermo è orgogliosa di celebrare questa ricorrenza e di contribuire con questo evento all'approfondimento e alla diffusione del dibattito scientifico nelle discipline economiche aggiungendo un tassello importante alla ritrovata dinamica culturale della città e della regione.

Un sentito ringraziamento va alle diverse istituzioni, associazioni e imprese che hanno reso possibile la manifestazione e soprattutto a tutti i relatori e studiosi che presenteranno i risultati delle loro analisi scientifiche e le loro proposte nel corso della conferenza.
